ABSTRACT

This report gives the number of engineering and technology degrees for the school year ending in June 1974. Tables appear in the following order: engineering degrees (bachelor's, master's, engineer's, doctor's) and technology degrees (associate, bachelor's, certificate, master's). The engineering tables include all 284 schools known to offer engineering degrees at the bachelor's level or higher. The data are essentially complete for the U.S. The technology degree tables include data from 423 schools. Summary tables are included at the end of the report showing the number of women, minorities, and foreign nationals included in the totals. The technology degree totals do not represent national totals because they include only those schools that have responded to the survey. (Author/PG)

ENGINEERS JOINT COUNCIL

ENGINEERS JOINT COUNCIL (founded in 1941 and incorporated in 1958) is an organization of engineering societies whose general objective is to advance the art and science of engineering in the public interest.

In furtherance of this general objective the Council shall:

(a) Provide for regular and orderly communications among its member societies.

(v) Act as an advisory and coordinating agency for member society activities, as mutually agreed.

(c) Organize and conduct forums for the consideration of problems of expressed concern to member societies.

(d) Identify needs and opportunities for service in the engineering community and inform the concerned engineering institutions.

(e) Recommend appropriate programs of studies and research to engineering institutions and especially to member societies.

(f) Undertake, in accordance with policies mutually agreed to, specific activities or projects that the member societies acting individually could not accomplish as well.

(g) Represent the member societies when they deem such joint representation desirable.

THE ENGINEERING MANPOWER COMMISSION OF ENGINEERS JOINT COUNCIL

The Engineering Manpower Commission was organized in 1951 as part of Engineers Joint Council, to serve as a focus for national technological manpower problems.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

"To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning those aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Board of Directors of EJC."

ENGINEERING AND TECHNOLOGY DEGREES 1974

GENERAL LAYOUT

This report gives the number of engineering and technology degrees as reported to the Engineering Manpower Commission of Engineers Joint Council for the school year ending in June 1974. Tables appear in the following order:

Engineering Degrees
- Bachelor's
- Master's
- Engineer
- Doctor's

Technology Degrees
- Associate
- Bachelor's
- Certificate - 2 year
- Master's

The engineering tables include all 284 schools known by EMC to offer engineering degrees at the bachelor's level or higher. The data are essentially complete for the U.S. In some cases we have grouped curricula under generic headings as described later, rather than under the title reported by the school.

The technology degree tables include data from 423 schools, including all 97 on the ECPD list for 1973. Of the entire group, 378 reported 2-year degrees (20 of these had only pre-engineering transfer programs) and 93 reported bachelor of technology degrees (45 of these had only 4-year programs.) The tables do not distinguish between engineering technology and industrial technology programs when these are reported under a technical category (e.g. electronics etc.) but do show those designated simply Industrial Technology in a separate column.

Summary tables are included at the end of the report showing the number of women, minorities, and foreign nationals included in the totals. The technology degrees in these tables are further broken down into engineering technology and industrial technology in greater statistical detail than the school-by-school tables.

The technology degree totals do not represent national totals because they include only those schools that responded to the survey. There is no way of knowing how many additional degrees may have been awarded by other schools. The 1974 technology degree data are not directly comparable to previous years' surveys because of variations in the schools responding each year.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Column 1 - School. Schools are listed by state, followed by a total for that state. The states are not listed in alphabetical order but are grouped according to regions: Puerto Rico, New England, Middle Atlantic, East North Central, West North Central, South Atlantic, East South Central, West South Central, Mountain, and Pacific.

Column 2 - Accreditation and Control (AC). The first digit is an accreditation code with the following meaning:

1 At least one engineering curriculum accredited by ECPD (1973 list.) Used only in the engineering degree tables.
2 At least one technology curriculum accredited by ECPD (1973 list.) Used only in the technology degree tables.
4 Accredited by a regional accrediting commission (1974-75 list.)
5 Accredited by NATTS (1973-74 list.)
6 None of the above.

The second digit indicates control of the school according to the following code:

1 Public - state or local government control.
2 Public - federal government control.
3 Private - nonprofit, nonsectarian.
4 Private - religious.
5 Private - proprietary.

The remaining columns give the number of degrees awarded by each school, by major curriculum group, as follows:
